LinkedIn

18% of budget · AED 40/day per ad at full tier · the quality engine

Three to four times the cost per lead of Meta, and roughly 65% qualified against Meta's 40%. Fewer, better, slower. This is where the multi-branch clinic group and the larger fit-out firm actually are.

Where to build it

Campaign Manager → **Advertise** → new campaign group → new campaign → objective **Lead generation**.

This is the one platform where a native lead form is right. LinkedIn pre-fills firmographics from the profile, so the form *is* the qualification — you get job title and company without asking.

Campaign level

SETTING	VALUE
Objective	Lead generation
Budget	AED 40/day per campaign
Schedule	**Weekdays only.** Pause Thursday evening through Sunday morning
Bid	Manual CPC to start. Switch to automated after 50 conversions

On the schedule. The UAE private sector largely runs Monday to Friday and Saudi runs Sunday to Thursday, so a campaign covering both has two half-strength days. LinkedIn CPMs are premium; paying them into a Friday feed is the most wasteful thing in this whole plan.

Audience

SETTING	VALUE
Location	United Arab Emirates
Job titles	Owner · Founder · Managing Director · Marketing Manager · Clinic Manager · Operations Manager · Practice Manager
Company size	11–200
Industries	Health & Wellness · Medical Practice · Architecture & Planning · Real Estate · Construction
Audience expansion	**Off**
LinkedIn Audience Network	Off for the first month

Why filters here and not on Meta. LinkedIn's identity data is self-reported and kept current because people's careers depend on it. That makes job title and company size genuinely precise in a way interest categories are not. This is the exception to the broad-targeting rule, not a contradiction of it.

Lead gen form

First name · last name · work email · company · job title. **Nothing else.** Every extra field costs completions, and the call is where you ask the rest.

Privacy policy URL is required. Thank-you message should restate the 24-hour promise, because that is the only thing they will remember.

The ads

Ad 1 — The AED Number · `ad-01-the-aed-number.png`

1200×627. One figure at enormous scale over a method line. The only asset in the batch that quotes a currency figure — and it is the prospect's cost, not Kyntlo's price.

Intro text

```
A missed consultation costs between AED 1,500 and AED 5,000. Most owners can quote that number without thinking.

Far fewer can quote how long their own enquiry form takes to get a reply.

We timed {{N_TIMED}} UAE businesses that were actively running ads. The median was {{MEDIAN_HOURS}} hours. {{N_NEVER_REPLIED}} never replied at all.

None of them had a slow team. They had a gap between a lead arriving and a human seeing it — nights, weekends, and the forty minutes reception is with someone else.

We close that gap in fourteen days, on your existing numbers and channels, with the success metric agreed in writing before we start. No migration, no new system to learn first.

The report is yours either way.
```

Headline (70 char) — `What one missed enquiry actually costs you` **Call to action** — Download

Ad 2 — the document ad · `document-ad-page-01..06.png`

LinkedIn's highest-dwell format, and the reason it wins is that the reader swipes through six frames inside the feed before deciding to convert. That pre-qualifies them better than any targeting filter.

Upload the six frames in order as a document ad. Every number is already measured — this ships today.

Intro text

```
We checked 62 UAE clinics that advertise on Instagram — every one of them paying for leads right now.

35 have a "Book Now" button that opens a form. 18 have no booking mechanism at all. 43 run their real funnel through a WhatsApp button that records nothing.

Only 8 have a working calendar, and none of those sits inside a system that sends a reminder or chases a no-show.

The full breakdown is in the six pages below, including how to check your own in about two minutes.

Take the method even if you never speak to us.
```

Headline — `62 UAE clinics. One audit. Five findings.`

This same file doubles as a sales leave-behind and an email attachment. One build, three uses.

Week one — what good looks like

METRIC	EXPECTED BAND
CPM	$30–48
CTR	0.4–0.9%
Cost per lead	$40–75
Qualified rate	65–70%

Cost per lead will look alarming next to Meta. Compare **cost per qualified lead** instead and it is competitive — that is the entire reason this platform is in the plan.

The failure mode to guard against

LinkedIn lead forms produce leads with **no memory of you.** Two taps, no website visit, and by the time you call they do not recognise the name. The counter is not in targeting, it is in fulfilment: the report must arrive within 24 hours carrying the headline they saw, because that headline is the only thing they will recognise.

Mistakes specific to this platform

- **Running at weekends.** Premium CPMs into an empty feed.
- **Audience expansion on.** It dilutes exactly the precision you are paying for.
- **Too many form fields.** Five is right. Seven is 20% fewer leads.
- **Judging on CPL.** Judge on cost per qualified lead or this platform always looks like a mistake.
- **Starting on automated bidding.** It needs conversion history it does not have yet. Manual CPC first.

Before this ad can run at all

Five things are missing site-side and no ad on any platform works without the first two:

1. **Conversion tracking.** This platform's pixel, plus GA4. Without it the campaign optimises on clicks, which is the metric least connected to money.
2. **The landing page.** `/leak-test` — one field (website URL + email), wired to the CRM. The ads all point here.
3. **Ad account + domain verification.** Meta's domain verification is the longest-lead item of the whole launch; start it first.
4. **Currency decided.** The site prices in USD, the internal docs in EUR, the strategy in AED. Pick AED for this market and make ads, page and checkout agree.
5. **Fulfilment staffed.** The offer is a free report inside 24 working hours. This campaign sells speed of response to people you have just taught to measure speed of response. If nobody is assigned to produce the reports, run a smaller budget rather than a slower promise.

Two rules that apply everywhere

Never edit a running ad that is performing. Editing resets the learning phase and throws away everything the algorithm knows. Launch the new version alongside it and let the old one die. Pausing is free; editing is not.

Never sum conversions across platforms. Meta's 7-day window and LinkedIn's 30-day window measure different things and both will claim the same lead. Report side by side and reconcile against the CRM monthly. When they disagree, the CRM wins.

Kyntlo creative batch 2026-10. Performance bands are expected ranges for UAE targeting, not commitments — recalibrate against your own first thirty days.
